- spoj náhradní autobusové dopravy, údaje o spojích jsou v jízdním řádu červeně
- přeprava jízdních kol jako spoluzavazadel v autobusech náhradní dopravy vyloučena
- přeprava spoluzavazadel s povinnou rezervací pro jízdní kola
- autobus náhradní dopravy vhodný pro přepravu cestujících na vozíku

- 25 jede v pracovní dny
- 26 jede v sobotu a neděli
- 28 jede v neděli a pracovní dny
- 29 viz trať 140
- 38 osobní vlaky viz trať 177
- 34 160,176,180,191

- 66 v sobotu ve vlaku řazený k sezení i vozy 1. vozové třídy
- 6 v sobotu
- 6 v sobotu
- 6 v sobotu

### Přeprava cestujících na vozíku:

Zajištění přepravy u spojů náhradní autobusové dopravy je možný pouze po předchozí objednávce. Požadavek je nutné objednat minimálně dva pracovní dny před plánovanou cestou prostřednictvím on-line [objednávkového formuláře](#) na [www.cd.cz/objednavka-cesty-vozickaru](http://www.cd.cz/objednavka-cesty-vozickaru), u pokladních přepážek ČD nebo telefonicky na Kontaktním centru ČD na čísle +420 221 111 122.

### Skupinové přepravy:

Při cestování skupin 20 a více osob je nutné cestu objednat nejpozději 3 dny před jízdou prostřednictvím on-line [objednávkového formuláře](#) na [www.cd.cz/objednavka-cesty-skupiny](http://www.cd.cz/objednavka-cesty-skupiny), u pokladních přepážek ČD nebo telefonicky na Kontaktním centru ČD na čísle +420 221 111 122.

### Přeprava zavazadel:

Spoluzavazadla se přepravují ve všech autobusech NAD do vyčerpání jejich kapacity, přeprava dětských kočárků je přednostní. Přeprava jízdních kol je umožněna pouze ve spojích NAD, označených symbolem (kapacita max. 7 kol). V ostatních spojích NAD je přeprava jízdních kol vyloučena.

platný od 15. 07. 2023 od 7:30 hod do 18. 07. 2023 do 16:50 hod.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
